PROFESSIONAL SUMMARY

Passionate and dedicated Full Stack Developer and final-year B.Tech Computer Science student specializing in Data Science at RGPV Bhopal. Hands-on experience building user-friendly, high-performance web, mobile, and AI applications using **Python, JavaScript, React, FastAPI, Node.js, and Flutter**. Experienced in developing practical AI systems integrated with Google Gemini API, creating scalable REST APIs, and solving dynamic programming problems with a **CodeChef Rating of 1890**. A proactive team player dedicated to clean code, continuous learning, and building software that creates positive real-world impact.

EDUCATION

School of Information Technology, RGPV Bhopal

Sep 2023 – Jun 2027

B.Tech in Computer Science and Engineering | Specialization: Data Science

SGPA: 7.64

Relevant Coursework: Data Structures and Algorithms, Web Development, Database Management Systems, Artificial Intelligence, Operating Systems, Computer Networks, Machine Learning.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, Java, SQL, Dart

Frontend Development: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Framer Motion

Backend Development: Node.js, Express.js, FastAPI, REST APIs, JWT Authentication, Microservices, WebSockets

Mobile Development: Flutter, Dart, Android, Firebase Authentication

Databases: MongoDB, PostgreSQL, MySQL, Firestore, SQLite

AI & Machine Learning: Gemini API, Machine Learning, scikit-learn, Random Forest, RAG, AI Agents, Data Visualization

Cloud & Tools: Git, GitHub, VS Code, Google Workspace

Soft Skills: Problem Solving, Team Collaboration, Technical Communication, Agile Development, Adaptability

WORK EXPERIENCE

Infosys Springboard — Java Intern (Batch 6.0)

Sep 2025 – Dec 2025 | Remote

- Completed an intensive Java training program, scored in the **top 15% of the batch**, and secured selection for Batch 6.0 internship.
- Delivered Java development assignments covering object-oriented design patterns, data structure implementation, and unit testing with **JUnit**.

Edunet Foundation — Data Science Project Intern

Jan 2025 – Feb 2025 | Remote

- Analysed 10 years of Indian agriculture data using Python with pandas, matplotlib, and seaborn libraries to generate executive-level policy insights.

CyberGyan, C-DAC — Linux and Cybersecurity Training

Jul 2024 – Sep 2024 | Remote

- Completed 200 hours of practical Linux system administration and Kali Linux training covering network security and penetration testing basics.

PROJECTS

HAQ Agent — Government Schemes Awareness Assistant [↗ \[GitHub\]](#)

Meesho AI Hackathon Top 500

TypeScript, JavaScript, Node.js, React, Gemini API, FastAPI, Vercel

- Shortlisted in Top 500 out of 36,000+ participants** in the Meesho AI Hackathon — engineered an AI portal to empower rural citizens with awareness of eligible welfare schemes.
- Built a full-stack web application with TypeScript and Node.js, enabling users to explore government initiatives and receive personalized eligibility guidance in real time.
- Deployed on Vercel with FastAPI AI microservice integration, achieving sub-second response times and a clean, accessible user experience for scheme discovery.

OmniAgent — Full-Stack Autonomous Agentic AI Reasoning Studio [↗ \[GitHub\]](#)

Python, FastAPI, Google Gemini 1.5, WebSockets, SQLite, HTML5/CSS3, JavaScript, Vercel

- Architected an Autonomous ReAct Planning Engine** using Gemini 1.5 and FastAPI, streaming multi-step Thought → Action → Observation loops over WebSockets with **<100ms latency**.
- Engineered a Multi-Agent Swarm Cluster** (Scout, Compute, Safety Critic) to execute decentralized web scraping, live mathematical computations, and hallucination defense.
- Built a sandboxed Python REPL and dual-tier Vector RAG vault for real-time document search (.pdf, .csv, .py) with Human-in-the-Loop (HITL) safety verification.

RoomSync — AI Roommate Matching Platform [↗ \[GitHub\]](#)

Node.js, Express.js, MongoDB, Gemini API, JWT Authentication, Vercel

- Designed and deployed a full-stack roommate matching platform for students across 10 Indian cities with secure JWT authentication.
- Created a 4-vector compatibility algorithm with a 12-question quiz that improved match accuracy by **60%** over random pairing.
- Integrated Gemini AI chat assistant for real-time guidance and automated profile matching across Vercel and MongoDB Atlas.

PathForge — AI Career Roadmap Mobile Application [↗ \[GitHub\]](#)

Flutter, Dart, Firebase Authentication, Firestore, Gemini 2.0

- Developed a cross-platform Flutter mobile application generating personalized AI career roadmaps across 25 engineering tracks.
- Integrated Gemini 2.0 to produce week-by-week study plans with curated YouTube resources, cutting manual planning time by **70%**.
- Implemented Firebase Authentication and Firestore for real-time progress tracking with persistent offline-capable data storage.

ACHIEVEMENTS AND CERTIFICATIONS

- Meesho AI Hackathon 2025:** Shortlisted in Top 500 out of 36,000+ participants nationally — built HAQ Agent.
- Competitive Programming: CodeChef Rating: 1890;** solved 500+ problems on LeetCode with Dynamic Programming focus; Codeforces Rating: 1559.
- Google Gen AI Exchange Program:** Chosen by Google Cloud and Hack2skill for AI innovation mentorship, achieved **Top 50 rank nationally out of 10,000+** participants.
- Google Student Ambassador & Cloud Arcade:** Promoted Gemini AI platform on campus, reaching 500+ students; received Legend Tier recognition.
- Google Skills Certifications:** Earned five certifications across Cloud Computing, AI, Machine Learning, and Data Analytics.
